THE COMPANY

RENAFAN – Care and Service

RENAFAN is one of the leading service providers in the fields of care for the elderly, intensive care and service for persons with disabilities. Our portfolio reaches from outpatient and inpatient care through innovative residential and service solutions to intensive care and assistance for persons with disabilities.

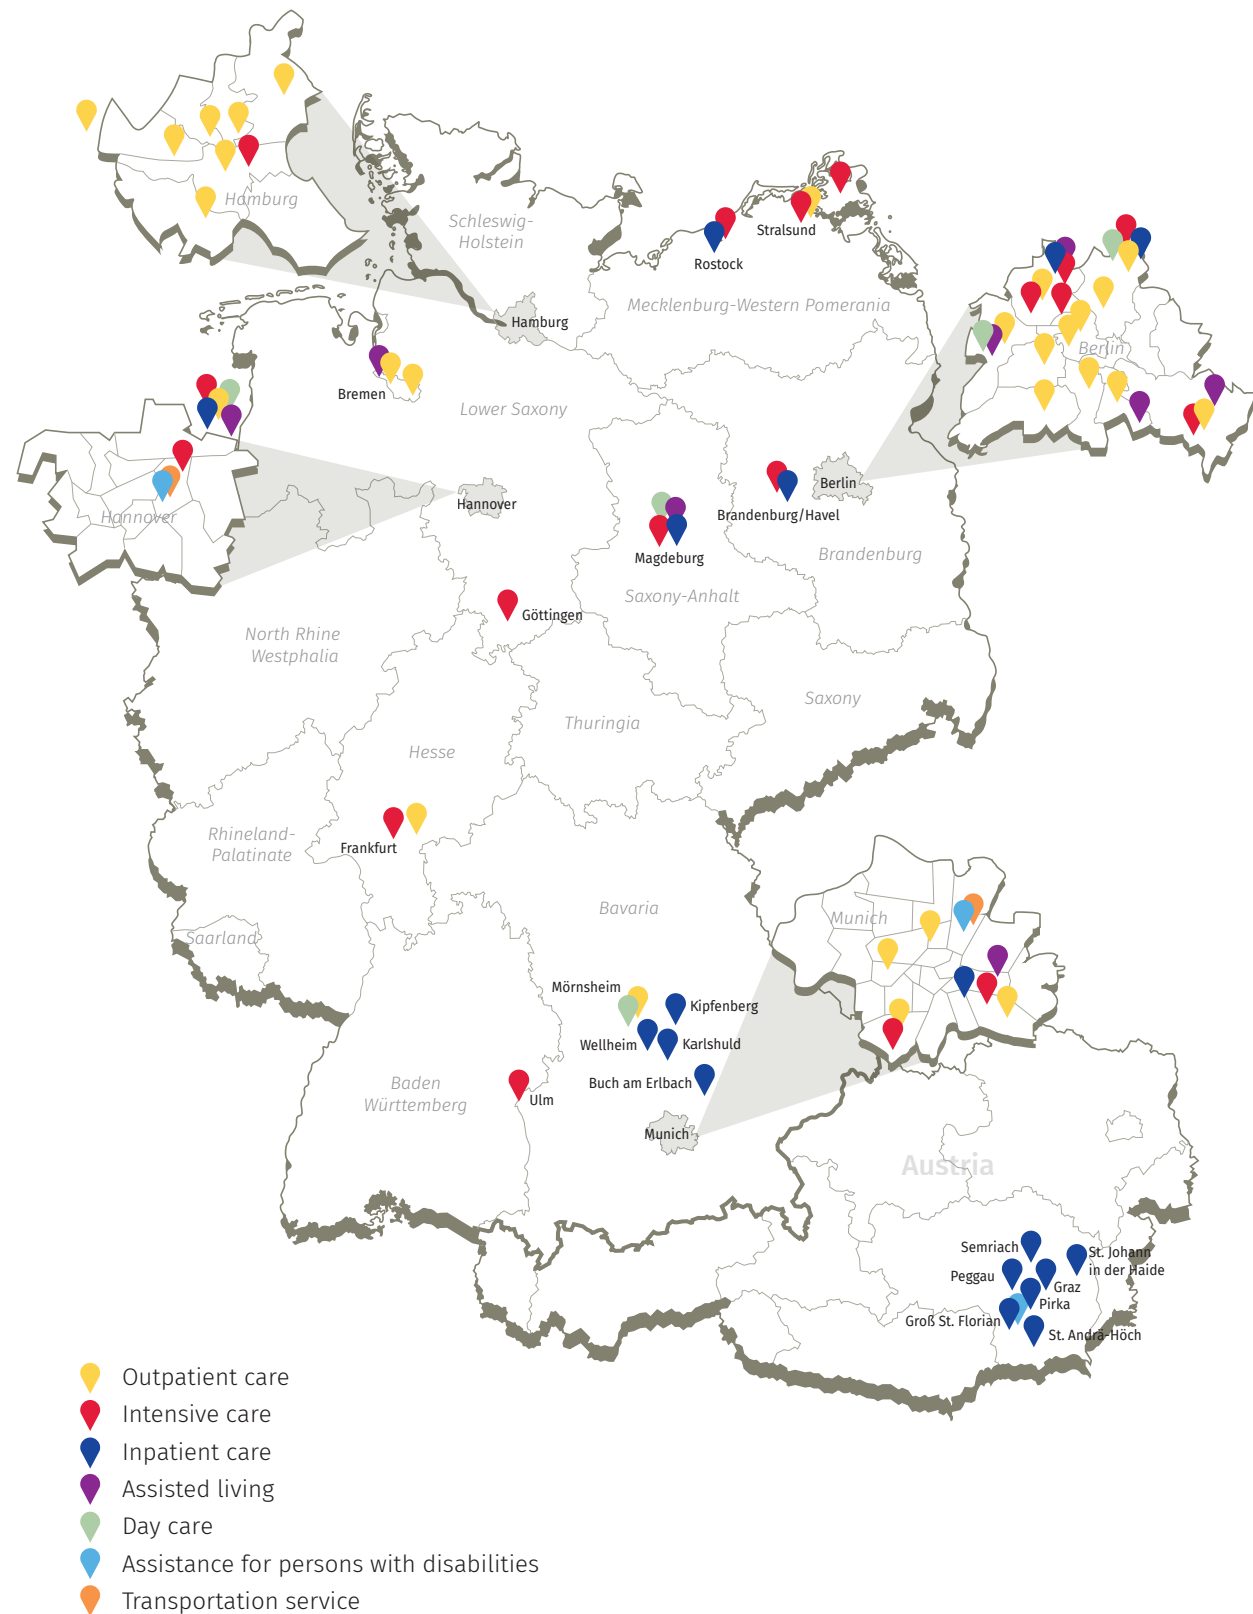

We offer our services at more than 70 locations - all over Germany and Austria. Approximately 8,200 persons trust our competence and reliability. We have more than 25 years of experience in providing individualized services for people. We follow the maxim of: as much independence as possible combined with as much care as necessary. Our strengths consist of an extensive network, tailor-made care solutions, a wide range of offers, highly qualified employees and integrative concepts.

At RENAFAN we provide our services through the divisions of outpatient geriatric care, intensive care (focussed on artificial respiration), assisted living and nursing homes (ServiceLeben) as well as assistance for persons with disabilities. Consistent focus on our clients, top quality of nursing and care, personalized solutions and maximum autonomy - this is what RENAFAN's care and nursing principles stand for.

In 1995 Renate Günther and Shaodong Fan founded the company in Berlin. Within a very short time it experienced strong growth also in other regions. By now RENAFAN has more than 4,500 highly qualified employees and it is one of the most active and quickest growing players in the private care sector.
